TAURUS OPTIONAL CLAMPS 2

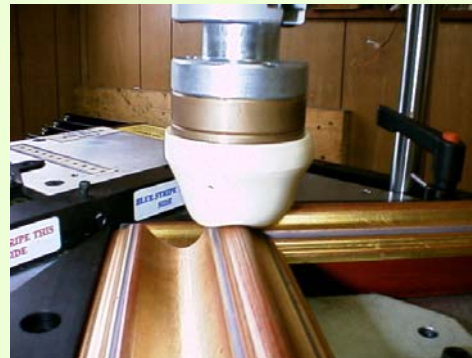

MBC

The Multi Blade Clamp

This optional clamp can be positioned on most profiles to give complete support, and even clamping pressure whilst pinning. It immediately adapts to the selected moulding. No need for specially shaped clamping rubbers. Low clamping pressure is required, typically 50psi. Blades are covered by a rubber sheath which can be replaced. Fits models 2KSM, 2KDB, 2KD, and 2KDE.

The Multi Pin Clamp

This optional clamp is extremely versatile in its operation conforming to virtually any shape moulding that is required to join without any adjustments required. It can be replaced the standard type clap rubbers simply by releasing one knob, sliding out existing clamp, and sliding this unit in place. An air assisted version is available for the pneumatic machines. The pins are covered by a rubber cap which is can be replaced. Fits models, 2KF, 2KS, 2FSX, 2KSE.

MPC

The Slim Pull Clamp

This optional extra clamp is a smaller version of the taurus patented clamping system. It draws the frame together from the top, downward pressure prevents movement of the frame whilst inserting fasteners. Clamp rubber pads can be changed. SPC2 fits models 2KF, 2KS, 2KSX, 2KSE. The SPC1 fits models 2KSM, 2KDB, 2KD.
