TAURUS SPARES

## Taurus Clamp Rubbers

These clamp rubbers are available individually (CHO17 for L/H, CHO18 for R/H), or supplied on the metal work assembly (CHO20). Different grades are also available according to the moulding,

Black = very soft

Red = soft

Blue = standard/hard

White = very hard

Taurus can also supply clamp rubbers in aluminium for special purpose (CHO20/ALLOY) All clamp rubbers can be profiled to your specification, but these will be supplied on the metal work (CHO20/PRO) The round clamp rubbers are available in different grades the same specification as the clamp rubbers. (CHO11)

## Unjaming Tool

This tool will assist the clearance in the event of a jam in the Underpinner firing heads. It has been manufactured to high calibration to match the PNU-nail and JPW V-nail shape. The tip has a pilot to help engage the head opening. This tool is essential for maintenance staff and prevents the use of foreign objects being used to clear jams, which can result in further damage.

### Part codes

UJVFH V-nail front head  
UJVRH V-nail rear head  
UJPNUFH PNU-nail front head  
UJPNURH PNU-nail rear head
